The enterprises of the MINSK CRYSTAL GROUP - holding produce more than 1000 SKU of alcoholic beverages and are the founders of companies that distribute their own products in the Russian Federation, Latvia and Armenia.

BELPIŠČEPROM

From antient to modernity. Only original recipes and natural ingredients.

The products of OJSC "MINSK KRISTALL" - the managing company of the holding "MINSK KRISTALL GROUP" are of high quality, thanks to the use of modern equipment and to the use of high-quality, environmentally friendly natural raw materials. The enterprise has a fully automated technological process for the production of rectified ethyl alcohol from grain raw materials.

By production of rectified ethyl alcohol, grain is used as a raw material: rye, triticale, corn, barley, wheat and oats.

The company has fully automated the technological process for the production of rectified ethyl alcohol of the following types: "Alpha" and "Lux".

Alpha is the highest quality class of alcohol. For its production we apply rye and wheat grain of the highest quality. The Alpha-alcohol is highly purified, that reduces the possible content of methanol to a minimum.

We aspire to be closer to nature. In manufacture. In the recipe.

By the production of our products only natural raw materials are used: alcoholized infusion of herbal raw materials (linden flowers, pine buds, natural roasted coffee, cinnamon, cloves, allspice, star anise, ginger), as a dye - sugar color, natural honey, alcoholized infusions of berries and fruits and more.

Knowledge about herbs was passed down from generation to generation, which was part of the life of the Belarusian people. It was believed that the forest, field, individual flower and every blade of grass had a soul. Belarusian healers had great knowledge about the methods of treatment and recipes based on herbs.

Laboratory control is carried out at all stages of manufacturing

Product quality is inextricably linked with production technology. We were the first in the country to master the production of apple and plum distillates, as well as alcoholic drinks based on them. To improve the organoleptic characteristics of products, modern methods of processing vodkas are used: linseed, silver, gold, platinum and diamond filtration.

Modern technology has been introduced for the preparation of drinking water used for production: treatment with “black” silicon, shungite and silver. These techniques give the prepared water the properties of spring water and improve the taste and aroma of drinks. The special attention at MINSK KRISTALL OJSC is paid to innovative technologies and modern technological methods, which allow not only to increase labor efficiency, but also to ensure consistently high quality of our products.

Our achievements

Proof of the recognition of MINSK KRISTALL OJSC as a manufacturer of high-quality and competitive products are the prizes that we regularly win in various prestigious competitions.

Since 1994 we have won more than 1000 awards! In 2022 our products received about 30 awards and diplomas of the highest standard.

For the eighth year in a row, the company has become the winner of the “POPULAR BRAND” award, has 77 “Best Products” awards, and is a 17-time leader of the “BRAND OF THE YEAR” competition.

OJSC "MINSK KRISTALL" - the management company of the holding "MINSK KRISTALL GROUP" was awarded the Grand Prix "Brand No. 1" in the Republic of Belarus.

OJSC MINSK KRISTALL is a six-time winner of the Prize of the Government of the Republic of Belarus for achievements in the field of quality.

The company's products have been awarded at professional foreign competitions: “BEST PRODUCT”, “BEST VODKA”, “PRODEXPO”, “EURASIA SPIRITS DRINKS”, “Golden Griffin”, “Best Product” and many others.

Organic vodka "Belaya Rus"

0,7 L 40 %

**Vodka "Belaya Rus" -
is the first organic vodka in Belarus!**

The uniqueness of vodka in the composition - no artificial food additives and flavorings, but only natural ingredients.

In the production of organic vodka, **Organic** alcohol is used, obtained from grain grown according to all the rules of organic farming:

in the soil of ecologically clean regions of the Republic of Belarus – Brest and Grodno regions, using only natural fertilizers, without the use of growth enhancers, pesticides, GMOs and other chemicals, which is also confirmed by the presence of European and national certificates of conformity. The soils on which grain was grown were not exposed to inorganic fertilizers for 5 years.

An additional highlight in the composition of organic vodka "BELAYA RUS" is an alcoholic infusion of bee bread, which gives the vodka a soft and nutritious harmonious taste.

The production of this vodka is limited, which is due to the peculiarities of obtaining raw materials used in production. Therefore, each bottle has its own unique identification number.

Vodka «MINSKAYA-KRISTALL»

Communication

Starting to communicate with the Konoplyanka character is very easy.

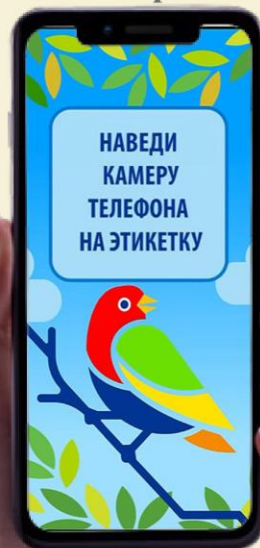

Step 1 - point your smartphone or tablet camera at the QR code located on the side of the bottle and download the app "Konoplyanka AR".

Step 2 - go to the "Konoplyanka AR" app and point your phone or tablet at the product label.

Konoplyanka

The bird will instantly come to life - it will literally fly off the label and speak in a human voice. At the initial stage of launching a product on the market, the Konoplyanka bird “gets to know” consumers and promises new meetings in the future. In the future, the bird's communication with customers will become more diverse. And the character will be funnier, more interesting and unpredictable.
